High Efficiency, Quiet and Reliable

Gas Furnaces

Up To

94%
AFUE

It is our top-of-the-line gas furnace. Quiet, dependable and extraordinarily efficient. In fact, at 94% AFUE*, these outstanding whole house heating units can slash operating costs by as much as 40% over older conventional gas furnaces.

Aluminized Steel Primary Heat Exchanger provides maximum efficiency and corrosion resistance.

Stainless Steel Secondary Heat Exchanger increases efficiency by capturing heat normally lost up the chimney.

Electronic Hot Surface Ignition System reduces energy costs by eliminating a standing pilot, and ensures dependable operation.

Integrated Control Module increases fuel efficiency, and is self-diagnostic for easy servicing.

Fully Compatible with our air conditioners (up to 5 tons), and many leading air cleaner and humidification accessories.

Offered in 40 - 140,000 BTU 94% AFUE efficiency models.*

A Perfect Match Every Time

Evaporator Coils

Our evaporator coils are "compatibility" and operate perfectly in conjunction with air handlers in central air and heat

80%
AFUE

Small in size, but big in the comfort it delivers to you and your family. At 80% AFUE*,

this high efficiency gas furnace can trim heating bills by as much as 25% compared to older gas heating technology.

Patented Clam Tube™ Heat Exchanger delivers the ultimate in cost effectiveness, reliability and energy efficiency.

Clean Burning In-Shot Burners ensure maximum efficiency from the heat exchanger.

Hot Surface Ignition with remote sensor operates quietly, and saves fuel by eliminating conventional standing pilot light.

Install Virtually Anywhere in Downflow, Upflow, Horizontal Right or Horizontal Left positions.

Offered in 50,000 - 125,000 BTU 80% AFUE efficiency models.*

Cool, Quiet, Comfortable

Air Conditioners

On the hottest night of summer, you'll be cool and content. Perfect indoor temperature, controlled humidity, improved air quality, all in a compact package that operates quietly and efficiently.

Heavy-Duty Compressor
produces maximum energy efficiency and cooling capacity.

High Efficiency Coil
improves efficiency and lowers operating costs.

Totally-Enclosed Fan Motor
is protected from the elements to extend service life.

Filter-Drier
protects compressor from moisture build-up in the system.

Offered in 10 and 12 SEER efficiency, 1½- to 5-ton models.*

engineered** to match
our gas furnaces
pump applications.

Year Round Complete Comfort

Heat Pumps

Heating. Cooling. Complete home comfort control, day-in and day-out, all year long. These quiet operating, high efficiency units can be counted on no matter how hot or cold the weather.

High Efficiency Coil
improves efficiency and lowers operating costs.

Heavy-Duty Compressor
produces maximum energy efficiency and cooling capacity.

Solid-State Time/Temperature Defrost Control Center
increases heating operation efficiency.

Crankcase Heater and Custom-Designed Accumulator
extend the life of the compressor.

Offered in 10 SEER 7.5 HSPF*, and 12 SEER 8.0 HSPF efficiency, 1½- to 5-ton models.*

*SEER: Seasonal Energy Efficiency Ratio. HSPF: Heating Season Performance Factor. AFUE: Annual Fuel Utilization Efficiency.
The higher the number, the more efficient the unit.

Heating and Cooling Outdoors

Single Packaged Unit

High efficiency gas heating and reliable electric cooling. All in a "single package" that sits outdoors...out of the way... for year 'round air conditioning, humidity control and whole house heating.

Hot Surface to Pilot Ignition
for reliable start-ups, and fast, economical heat delivery.

Multi-Port In-Shot Burners
resist corrosion, and are pre-set for optimum fuel/air mixture.

Unique Coil Design

features rifled copper tubing and enhanced aluminum fin construction for maximum heat transfer and efficiency.

Tubular Aluminized Steel Heat Exchanger

efficiently transfers heat, resists corrosion, and extends system life.

*High efficiency 80% AFUE*10 SEER* operation.*

Quiet, Efficient and Effective

Air Handler

This super quiet, highly efficient single piece air handler evenly supplies conditioned air throughout your home, whether used with an air conditioning or heat pump system. Fully insulated cabinet reduces operating sound and minimizes summer sweating.

The Perfect Match
to 10 or 12 SEER outdoor air conditioning or heat pump units.

Fully Insulated Cabinet
controls operating sound and minimizes unit exterior condensation.

Back-up Electric Heat
available, either factory-installed or field-installed.

Install Virtually Anywhere
in upflow or horizontal left/right positions.

Quality In. Quality Out.

You Get Out of a Product What You Build into It.

All of our home comfort products begin with state-of-the-art design and engineering, enriched by more than a century of experience in the manufacturing of heating, ventilating and air conditioning equipment.

Quality is Built into Every Product, from the Inside, Out.

Throughout our equipment, you'll find top quality materials like aluminized steel and stainless steel heat exchangers for efficient heat transfer and long service life. Rifled copper tubing and advanced electronic

controls are typical of the attention we pay to long-term performance.

Only superior burners, igniters and motors to assure years of reliable service earn the right to be part of our products. And only pre-painted galvanized steel cabinets to resist rust and corrosion meet the "best test" we demand.

And before any product leaves our plant, it is completely factory assembled, pre-wired and fully tested to help assure safe, economical installation and dependable operation. You'll also be glad to know that

our plants have earned the appropriate ISO 9000 Certification, indicating strict compliance with internationally-recognized manufacturing standards.
